

CLEANING THE EXTRACTOR

WARNING!

The operations described in this technical data sheet and those contained in the relative video tutorials which can be captured via QR CODE must only be performed by qualified technicians and only after having read the safety information contained in the specific sections of the use and maintenance manual.

When in doubt, do not interpret! Instead directly contact the Colombini Srl technical assistance service at +39 011 8211407 service@colombini.srl

To remove/reinstall the extractor, the following are required:

- a) Allen wrench - 5 mm
- b) wrench - 13 mm
- c) socket wrench - 19 mm

REMOVING AND CLEANING THE EXTRACTOR

WARNING!

Disconnect the machine electric power supply.

WARNING!

Use cut-resistant gloves.

- Using a 5 mm wrench, unscrew and remove the Allen screw securing the seal ring and remove it from its seat.
- Turn the extractor unit fully outwards.
- Using a 13 mm wrench, unscrew the three bolts securing the plexiglass cover and remove them.
- Remove the plexiglass cover.
- Using a 19 mm socket wrench, unscrew the central nut and washer securing the impeller and remove it.

WARNING!

Set a suitable tray under the densifier unit to collect any product.

- Remove the impeller from its seat and clean it using a cloth.

- Thoroughly clean the inside of the extractor compartment of any residues of the material processed.

REINSTALLING THE DENSIFIER

- Pay attention to the position of the impeller in its seat: the slot on the impeller must be inserted in the pin on the shaft when assembled.

- Return the extractor to its operating position and, using a 5 mm wrench, secure the sealing ring with the Allen screw.
- Insert the impeller into its seat.
- Insert the washer and nut that were previously removed and, using a 19 mm socket wrench, tighten the nut to lock the impeller in place.
- Insert the round plexiglass cover.
- Using a 13 mm wrench, secure the cover with the three bolts.
